

# DORON BRAYER

- Joined the industry in **December 2011**
- Works at **Orient** since **February 2022**
- Speaks **English—Fluent** and **Hebrew—Native**
- Lives in **Yavneh, Israel**
- Available at **0524797723**

With nearly 12 years of experience in **automated testing** (7yrs), **front-end development** (4½yrs), and **UX design** (Google-certified), I deliver reliable user-centric components. I also lead 3+ QA engineers, ensuring **high test coverage** and **timely delivery**.

## [What others say about me](#)

## Skills

### Soft skills

- Thoroughness
- Empathy
- Integrity
- Collaboration
- Written communication
- Creativity
- Self-education
- Innovativeness
- Long-term thinking
- Self-awareness

### Hard skills

- Automated testing
- Manual testing
- CI
- CD
- Front-end development
- UX design
- Web analytics
- Data querying
- Technical writing
- SEO

## Tools & Tech

### { } Development

- JavaScript
- TypeScript
- CSS
- HTML
- Node.js
- DevTools
- Git
- Playwright
- Cypress
- TestCafe
- Jenkins
- React
- WordPress
- Linux
- AWS
- SQL

### UX design My long-time interest

- Figma
- CSS for design
- Adobe XD
- Google Analytics
- Google Optimize

## QA team leader

Orient 2/2022 to **Present**

Portion of hands-on programming 30%

Language(s) JavaScript TypeScript

Product type(s) B2B iOS app Android app

- Making my team more productive, by training each member on automation methodologies and best practices.
- Increased the quality of 4 mobile apps, by implementing effective QA processes.
- Ensured successful completion of 6 projects, by leading and mentoring 3 engineers.
- Established synergy between **all R&D teams**, by maintaining strong relationships with product managers and team leaders.

## Tech lead (automation for web apps)

Redis 2/2020 to 2/2022

Portion of hands-on programming 60%

Language(s) JavaScript TypeScript

Product type(s) B2B SaaS Web app

- Increased the velocity of a **tremendous project**, by closely guiding 4 testers.
- **Kick-started a new era of automation**, by implementing innovative solutions.
- Raised the productivity, by researching and presenting new tools/methodologies.
- Ensured code healthiness, by reviewing the deliverables of **7+ developers**.
- Boosted teammates proficiency, by teaching them all needed tech solutions.

## UI automation engineer

Redis 4/2016 to 2/2020

Ratio of tests ⅔ automated ⅓ manual

Language(s) JavaScript TypeScript

Product type(s) B2B SaaS Web app

- Provided a detailed picture of the feature, by analyzing test results and reporting defects in Agile (Scrum) environment.
- Covered complex scenarios in a stable manner, by carefully extending and modifying the automation infrastructure.
- Reduced manual effort, by developing **120+ automated tests** that cover varied features.
- Ensured the stability of the products, by integrating tests into CI/CD pipelines.

## Accomplishments

Founder of automation

Long-term employee

Open-source contributor

Dedicated tutor

Endorsed expert

Major initiator

[More info](#) 

## Education

### Professional certificate in UX Design

Google Career Certificates 2021 to 2022

[Seven paid courses](#), developed by Google, that extensively cover the UX design process.

[My certificate](#) 

### Professional certificate in Project Management

Google Career Certificates 2021

[Six paid courses](#), developed by Google, that extensively cover the project management process.

[My certificate](#) 

### Interactive Media

Sapir College 2009 to 2011

Practical engineering; Hands-on studies in web development and user experience.

## Military service

### Security NCO

Israeli Air Force 2004 to 2007

Completed a 3-year service (including combat training) as a Staff Sergeant.

## Front-end developer

Redis 3/2015 to 4/2016

- Beautified the "digital face" of the company, by extending and renovating the GUI of the [Redis.com](#) website.
